To help your body increase immunity, digest food, remove waste, and create essential vitamins and nutrients.*

FEATURES AND BENEFITS
- Micro-encapsulated strains reach the intestinal tract with high efficiency
- Scientific validation of each strain used in the product
- Supports digestive health and promotes normal bowel function
- Reduces inflammation in the gut and supports the immune system
- Appropriate for children

SUGGESTED USE
ProBionic is packed in lightproof, water-resistant packets that ensure the probiotic will be effective up to the moment you use it. It’s also convenient to take. You can take it dry or, if you’d like, you can stir the contents of one mildly sweet packet into the beverage of your choice.

SCIENCE
A healthy person lives in harmony with his or her intestinal flora. The bacteria—which, in a healthy person, will be predominantly friendly types—do a myriad of health-promoting things for the person, including: detoxification, the production of vitamins, and protecting us from unfriendly organisms. Sometimes this balance does not exist because of the presence of pathogenic organisms, the overgrowth of unfriendly organisms that are often not considered pathogenic, or the absence of friendly bacteria. Maintaining healthy intestinal flora can make a difference in a person's health.

The four strains in Bios Life ProBiotic serve different purposes when taken:

**lactobacillus acidophilus LA 02**
- Shown to help body promote intestinal comfort

**lactobacillus rhamnosus LR 04**
- Shown to help body promote intestinal transit

**bifidobacterium brevis BR 03**
- Shown to help body support natural barrier effect in the gut

**bifidobacterium lactis BS 01**
- Shown to help body promote natural immune defenses

Together these strains provide the elements necessary to promote health digestion.
REFERENCES

**FREQUENTLY ASKED QUESTIONS**

**Q.** Will I feel a difference taking this product?

**A.** As digestive health improves, you may feel less bloated and note increased energy.

**Q.** Why should I feel less bloating on this product?

**A.** The bloated feeling after meals is usually caused by fermenting bacteria. As the microflora and microfauna are regulated in your digestive tract, some of the pathogenic bacteria causing gas may be eliminated.
